

Risk assessment SB/IB-Centrifuge (High speed) Avanti J-20 XP

Produced 2010-05-11 By Riskbedömare 2 Livsvetenskaper
at Systembiologi och industriell bioteknik.
Modified 2015-11-09 By Cecilia Sundelin

Final risk assessment of the method

4. Very high risk

1. State the premises in which the activity is taking place

Fysik Forskarhuset

Floor Room

Kemi forskarhus 1

Floor Room

Kemi kurshus

Floor Room

Plan 6 6176B -80 degree freezer

Centrifuge room

2. Description of activity

An apparatus used in the laboratory for separating substances of different density or particle size, when suspended in a fluid, by spinning them about an axis in a suitable container.

3. Products

Product name	Concentration	Form	Quantity	Danger	Comments
--------------	---------------	------	----------	--------	----------

4. Risk category

a:very high risk

5. Level of exposure

6. Ventilation

7. Biological material

8. Comments on Biological material

9. Risk codes

10. Comments on risk codes

11. Premises

12. Comments on premises

13. Protective signs

14. Comments on protective signs

15. Personal protective equipment

16. Comments on Personal protective equipment

17. Describe the technical equipment

Rotor chamber, rotors, cannisters, cannister lids

18. Environment

19. Comments on environment

20. Waste management

21. Comments on Waste management

22. Emergency equipment

23. Comments on Emergency equipment

24. Hazardous actions

centrifuge

25. Comments on Hazardous actions

NEVER run the centrifuge without proper training from responsible person!

Centrifugation is always hazardous since high speeds result in great forces. Great damage could result from improper handling of the centrifuge! The SOP must always be followed!

The rotor should always be balanced before a run and all buckets should be in the rotor.

Never centrifuge materials capable of developing flammable or explosive vapors, for example chloroform or ethyl alcohol.

26. Special instructions to other personel

27. Accidental readiness

If a tube breaks in the centrifuge clean it up immediately! Dirt will eventually make the rotor corrode which may lead to serious accidents.

28. Final risk assessment of the method

4. Very high risk

29. Comments on final risk assessment and additional risk reducing measurements

NEVER operate the centrifuge without given proper training from responsible person! You may cause serious injury to yourself and to others around you!
